

SILESTONE®
by COSENTINO

Cosentino, the manufacturer of Silestone, is the world's largest quartz countertop producer. With 11 lines producing countertop slabs, we'll always have material ready for your home. Cosentino has an environmental commitment to reinstate quarries with their natural vegetation after being mined. In addition, during our manufacturing process we reclaim 98% of water used to manufacture the material. Cosentino is a GREEN focused company striving to better the world in which we live.

clean. green. modern luxury.

Silestone is recognized around the world as the leader in Quartz countertops. Silestone® is the perfect choice for:

- ✓ Counter tops
- ✓ Table tops
- ✓ Floor tiles
- ✓ Backsplashes
- ✓ Vanity Tops
- ✓ Wall tiles

Silestone® Quartz A Cleaner, Safer Surface.

Exclusive Benefits To Silestone

Largest slab sizes

We offer the largest slab size in the industry. A 10 foot 8 inches x 5 feet 4 inches slab will fit most large islands without having a seam in the island.

Silestone is the only countertop with built-in Microban protection that safely fights the growth of microbes such as odor-causing bacteria, mold and mildew 24/7 for the life of the product. While Microban does not protect against food-borne illness and is not a substitute for normal cleaning practices, it does make Silestone easier to clean and keep clean.

Silestone has a 15 year manufacturer warranty - the best in the industry.

Silestone contributes to better indoor air quality because it has low-to-no emission of toxic chemicals into the indoor environment.

Silestone has Certification under NSF 51 as a safe material for use in areas where food preparation could take place.

Endorsed by Candice Olson:

Silestone is the best choice for improving the value of your home.

ZenSeries

With 6 colors to choose from, Silestone offers you an urban contemporary look with our new **Zen Series** of colors.

MountainSeries

If you're looking for granite, but want the convenience and low-maintenance of Silestone, check out our new **Mountain Series** with an exclusive 5 color mix process.

The Silestone Connection

Quartz

Besides its natural depth of color, Silestone® Quartz has unparalleled durability and strength. The only natural minerals harder than quartz are diamond, sapphire and topaz.

Reliability

Silestone is a hard, dense and non-porous material that is consistent throughout its composition, making it more reliable than any other natural stone.

Antimicrobial protection

Silestone is the only countertop with built-in Microban product protection to safely fight the growth of microbes such as odor causing bacteria, 24/7 for the life of the product resulting in countertops that are easier to clean and stay cleaner between cleanings.

Manufacturer's Warranty

Silestone offers a 15-Year non-transferable material warranty. Customers must register their installed product with Cosentino. More information is available on www.silestoneusa.com.

Scratch-resistance

Common household accidents such as a dropped knife, a fallen piece of glass or errant scissors will not scratch Silestone because only materials as hard as, or harder than Silestone will scratch it. Beware: no surface is indestructible.

Stain-resistance

Because Silestone is non-porous, most spills stay on the surface and are easy to clean with soapy water or a mild household cleaner. UNLIKE GRANITE, YOU NEVER HAVE TO SEAL SILESTONE.

Heat-resistance

Silestone is heat- and scorch-resistant. It will withstand limited exposure to heat without burning or scorching. The fire of a lit match will not mar the Silestone countertop. However, as advised by crock-pot and electric skillet manufacturers, do not place these items directly on any countertop. We recommend the use of trivets when placing hot items on a Silestone surface.

Care & Maintenance

Silestone Quartz is virtually maintenance-free. It does not need to be sealed and cleaning is a cinch. Simply wipe the surface with soap and water on a regular basis to maintain its beauty and shine for years to come.

Difficult spills

To remove difficult spills, soak the area for 10 minutes with a mild household cleaner (such as Formula 409®, Lysol®, or Windex®) then rinse and clean away with a soft Scotch Brite® pad. For stains that harden as they dry, such as food and gum, remove by gently scraping off of the surface (using a blade or putty remover) and then clean using warm water and soap.

Extreme heat

Silestone is resistant to heat and can withstand moderately high temperatures for brief periods of time without being damaged. As with any natural stone, however, certain exposure to heat may cause cracks due to thermal shock. Always use a trivet to place hot items on Silestone. Do not use crock pots or electric skillets while in direct contact with Silestone natural quartz surfaces.

Harsh chemicals

The following may harm Silestone: Drano®, Liquid Plumr®, oven cleaners and floor strippers. Do NOT use these or any other harsh chemicals on your Silestone Quartz surface.
