

### Test Method C-179-90 (1999)

#### Standard Test Method for Determining the Compressive Strength of Dimension Stone

This test measures the abrasion resistance of all types of stones with uses where the wear is caused by the abrasion of foot traffic.

This standard does not purport to address all of the safety concerns, if any, associated with its use.

It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

#### **Silestone® Results:**

Compressive Strength (ASTM C-170)

**29,100 psi**
