

Test Method C-672/c-672m-98

Standard Test Methods for Scaling Resistance of Concrete Surfaces Exposed to Deicing Chemicals

This test measures the resistance to scaling of a horizontal concrete surface exposed to freezing-thawing cycles in the presence of deicing chemicals. It is intended for use in evaluating this surface resistance qualitatively by visual examination.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Silestone® Results:

Deicing (ASTM C-672)

Pass (Rating 0)
