

Test Method UL-94

Standard Test Method for Testing the Flammability of Building Products

This fire-test response standard for comparative surface burning behavior of building materials is applicable to exposed vertical surfaces such as walls.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Classifications	Best	94V-0
	Good	94V-1
	Poor (drips)	94V-2

Silestone® Results:	Flammability	94V-0 BEST
