

Test Method C-1026-87 (1996)

Standard Test Method for Measuring the Resistance of Ceramic Tile to Freeze-Thaw Cycling

This test measures the resistance to repeated cycles of freezing and thawing.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Silestone® Results:

Flexural Strength (ASTM C-880)

5840 psi
