

Test Method C-484

Standard Test Methods for Determining the Thermal Shock Resistance of Glazed Ceramic Tile

This test determines the resistance of glazed ceramic tile to thermal shock.

This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Silestone® Results:

Thermal Shock (ASTM E-484)
